

LOGO GUIDES

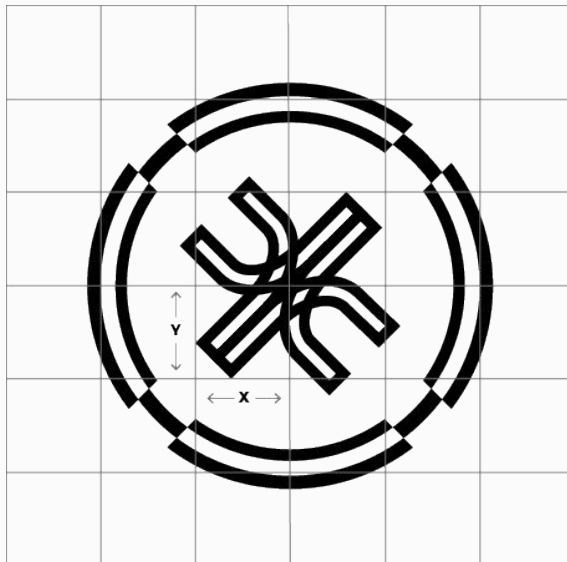

Junction has two logos: **wordmark** and an **emblem**.

When using Junction logos, a couple of things should be taken into consideration:

First of all, **remember to respect the white space around the logo.**

Secondly, **please don't use these logos together.** Use the wordmark if you are not certain the emblem alone will be recognized.

JUNCTION

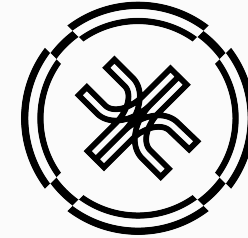

JUNCTION

Black logo

rgb = 0/0/0

html = 000000

cmyk = c0/m0/y0/k100

JUNCTION

White logo

rgb = 255/255/255

html = fffffff

cmyk = c0/m0/y0/k0

Black or white logo?

When using the logo on top of a photo make sure the contrast is high enough between the background and the logo, so it can be seen clearly.

Other restrictions

The logo should never be any other color than black or white.

Adding effects to the logo such as shadows or embossing is not allowed.

Changing the dimensions of the logo from the original
